

Mechanical Quality Control Inspection

Great Hall Builders (GHB) is inviting qualified firms, especially MWBE firms, to participate in the Request for Qualifications (RFQ) for Mechanical Quality Control Inspection Services for the Denver Great Hall remodel project (remodeling of the Jeppessen Terminal).

Scope of Work

The Mechanical QC Inspection Consultant shall be involved with the supervision of project documents as material submittals, shop drawings, methods of installation, site delivery inspections for drainage, water supply, HVAC, gas and fire suppression. The consultant will coordinate the site inspection for every trade with the subcontractors and owner representative.

Examples of duties to perform and abilities required:

- Coordination of project submittals
- Coordination of material delivery inspections upon delivery to site
- Site quality inspection
- Monitoring of submittals
- Monitoring of site inspections
- Coordination of testing and commissioning inspections
- Coordination with Construction Department

Requirements

- Experience on water supply, drainage, gas, HVAC and fire suppression.
- Working knowledge of code compliance.
- Airport experience is preferred but not required.
