

# DENVER INTERNATIONAL AIRPORT

## TELECOMMUNICATIONS TENANT SERVICES- SERVICE DETAILS

### CABLE TELEVISION SERVICES (DIATV):

TTS Video services represent connections to the Denver International Airport Television System (DIATV).

Video Comments:

1. The DIATV system is a transport system that delivers cable television-like services from the service provider head-end to the various coaxial drops/connections on the DIA campus. Customers are NOT authorized to “split” the coaxial signal as this may degrade signal quality at neighboring drops/connections.
2. Charges related to DIATV relate to the transport of the signal, not the content.
3. Content is determined by a pre-arranged agreement between the City and the service provider.
4. A one time charge of \$50/order applies on new service activation and moves/adds/changes of services. Multiple services can be ordered on the same order.

<b>MRC Code</b>	<b>Monthly Recurring Charge</b>	<b>Short Description</b>	<b>Long Description</b>
140	\$ 50.00	DIATV service	DIATV service-per connection monthly recurring charge.
