All Aboard - The Train to the Plane Has Officially Opened

The University of Colorado A Line is 23 miles of rail that is making local and international travel easier than ever.

The new line opened on April 22, 2016. It provides easy, affordable and reliable connections between downtown Denver, Denver International Airport, and the many communities along Interstate 70. With connections at Union Station to the [C](#), [E](#) and [W](#) light-rail lines, the [G](#) and [B](#) commuter-rail lines later this year, and local and regional buses, your public transportation options now have an international connection: the A line.

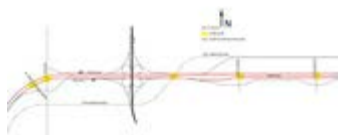

Hundreds of people rode the A Line to the airport on the commuter rail's opening day, April 22. On the plaza between the Westin hotel and Jeppesen Terminal elected dignitaries spoke about the importance of the new rail line and celebrated its completion.

Denver Mayor Michael B. Hancock and Colorado Senator Michael Bennett listen to speeches that marked the opening of the University of Colorado A Line that links Denver's Union Station to Denver International Airport. The rail system debuted on April 22, 2016.

The RTD's new University of Colorado A Line to Denver International Airport was officially inaugurated on April 22. Some of the dignitaries who cut the ceremonial ribbon to commemorate the occasion are pictured here. Left to right: Colorado Governor John Hickenlooper; Denver Mayor Michael B. Hancock; Denver International Airport CEO Kim Day; RTD General Manager and CEO Dave Genova; U.S. Senator Michael Bennett; Second Vice Chair Barbara Deadwyler, RTD Board of Directors; and U.S. Representative Diana DeGette

Denver International Airport to Complete Second Phase of Bridge Work on Peña Boulevard

Crews reduced the lane width and realigned sections of inbound and outbound Peña Boulevard between approximately Tower Road and Jackson Gap Street, as part of a project to rehabilitate a total of 10 bridge structures along the roadway.

The project will repair damaged and deteriorating concrete on the bridges, which

are now more than 20 years old. It will include the removal and replacement of concrete bridge curbs and bridge railings at the following locations along Peña Boulevard (two bridge structures per location):

- West Fork of Second Creek

- Tower Road

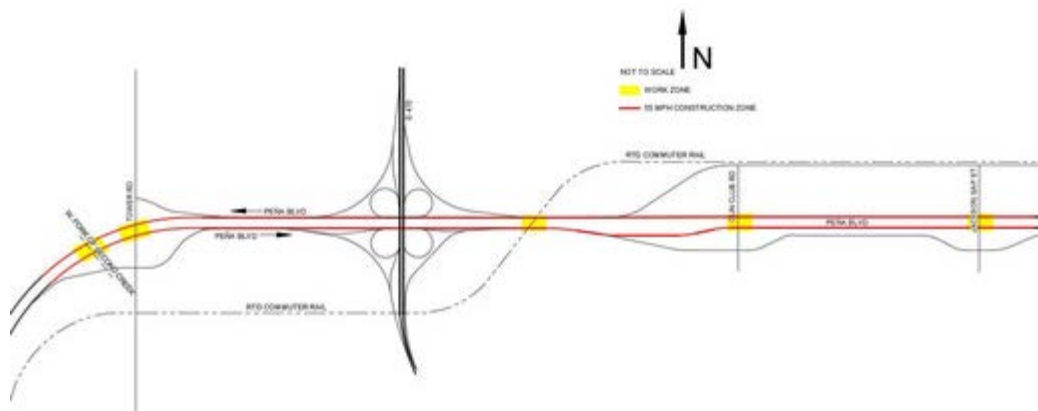

- Piccadilly Road (underneath RTD bridge)

- Gun Club Road

- Jackson Gap Street

Crews are working on one side of the bridges at a time and realigning traffic as the work progresses. Drivers will encounter minor traffic impacts as the lanes are moved. All existing lanes of traffic in each direction will be maintained during the day, with some single- and double-lane closures overnight.

The speed limit on Peña Boulevard will be reduced to 55 mph throughout the construction zone for the duration of the \$3 million project, which is expected to last through the end of October. Motorists are strongly encouraged to follow the posted speed limits, and allow extra time for travel through the construction zone.

New Exhibit Zooms in on Colorado from Space

The Centennial State from Space, produced by the Westminster, Colorado-based company DigitalGlobe, is a series of high-resolution satellite images taken from five different satellites positioned more than 400 miles above the Earth. Several iconic Colorado locations—including Coors Field and the Air Force Academy, plus landscape tableaux like the agricultural fields at Monte Vista and more—can be seen at the Y-Juncture Gallery at A Gates, located just over the bridge from the A-bridge security checkpoint. The exhibit, in place through September, can be seen

along either pedestrian walkway leading from the junction.

An image of Sports Authority Field at Mile High is captured from a satellite. The photograph, produced by Digital Globe, is part of the "Centennial State from Space" exhibit currently showing at Denver International Airport

The Centennial State from Space is on loan from Wings Over the Rockies Air & Space Museum. The exhibit illustrates the technological capabilities of DigitalGlobe, which produces Earth imagery and information about our changing planet.

More information about Wings Over the Rockies Air & Space Museum, as well as DigitalGlobe, can be found at wingsmuseum.org/ and <http://www.digitalglobe.com/>.

See photos of the *The Centennial State from Space* exhibition at DEN [here](#).

Denver's Lowry neighborhood, captured in an aerial view, is shown in a satellite-produced photograph. The image is part of the "Centennial State from the Air" exhibit at Denver International Airport.

Design, Construction & Professional Services Information Session

Future Airport Opportunities — Projected Competitive Contracts

Denver International Airport is committed to a strong partnership with our business community and to ensuring local businesses have viable opportunities in building DEN's future.

Below is a preview of upcoming business opportunities at DEN in advance of their advertisement. The City and County of Denver will assign M/WBE/DBE goals and other requirements to each contract when advertised. Visit the [Office of Economic Development's "Do Business with Denver"](#) website to learn how to initiate a partnership with the airport and the City and County of Denver on future projects. This information will be updated regularly. DEN reserves the right to cancel or alter project information at any time.
